

## VineMAP Report

---

**Customer name:** vinescapes  
**Email:** vinescapes  
**Telephone:**

**Reference:**  
**Date:** 7 October 2019

**Products:**

1. Topographic suitability & grading
2. Soil suitability information, landcover suitability and designated 'protected' areas
3. **Flood risk and access maps**
4. All terrestrial reports (Reports 1 - 3)
5. Climate (including Frost Risk / Report No.6)
6. Frost risk
7. All terrestrial and climate suitability reports

**Area coverage:** 65.3 hectares (ha)  
**Location:** Lewes, England, United Kingdom  
**National Grid reference:** TQ 433 147

**Report description:** This report was generated using Vinescapes' Vineyard suitability Mapping and Assessment Program (VineMAP), powered by maploom. Maps, data, scoring and results within this report are provided to assist in viticulture suitability assessments. Where serious consideration is being given to establishing a vineyard on land evaluated within this report professional expertise should be sought from Vinescapes to advise on and undertake additional analysis. This includes detailed soil assessments, site and soil amelioration requirements, vineyard design, variety and planting material recommendations, business planning and project management. This report should not be relied on as the sole determinant for viticulture suitability, vineyard establishment or wine production business ventures.

## Flood risk

Resolution:

Data source: Environment Agency

0 m

500 m

© Environment Agency copyright and/or database right 2019. All rights reserved. © HERE, 2019

**Flood Zone 3** is Environment Agency's best estimate of the areas of land at risk of flooding, when the presence of flood defences are ignored and covers land with a 1 in 100 (1%) or greater chance of flooding each year from Rivers; or with a 1 in 200 (0.5%) or greater chance of flooding each year from the Sea. Land within flood zone 3 includes land identified by Local planning authorities in their Strategic Flood Risk Assessments as areas of functional floodplain and its boundaries accordingly, in agreement with the Environment Agency.

### Flood zones legend

**Flood Zone 2.** Land and property in flood zone 2 have a medium probability of flooding. This includes land with between a 1 in 100 and 1 in 1,000 annual probability of river flooding; or land having between a 1 in 200 and 1 in 1,000 annual probability of sea flooding. Land falling within this zone requires a flood risk assessment as part of the planning process.

**Flood Zone 1** defines areas which have a greater than 1 in 1,000 year flood risk. They are not shown on the map as effectively they are "everything else". A flood risk assessment may be required for developments in flood zone 1 and more than > 1 hectare; in an area with critical drainage problems as notified by the Environment Agency.

## Mapping Overview

Mapping for this report was generated using the maploom platform. This is a cloud based geospatial analysis and modelling platform that uses open standards and open source analysis tools to deliver a wide range of location-based insights to non-specialist users. Further details can be found at [www.maploom.com](http://www.maploom.com).

## Mapping Datasets

The geospatial datasets used within the report are predominantly drawn from open source datasets. For each map, the data sources and relevant citations are provided.

Vinescapes provide wine production services, knowledge and innovation to the English viticulture sector. Vinescapes work with prospective, new and established wine producers to achieve outstanding wine quality and successful business ventures. We can take your vineyard idea from conception to delivery starting from business planning & site selection through to the successful establishment of a vineyard & winery.

Our staff and partners are trusted experts with international acclaim and years of experience delivering the highest quality grape growing and winemaking. We combine to bring our knowledge, expertise and passion to wine businesses across the UK. We provide vineyard assessments (land & climate), vineyard project management & consultancy, winery design & construction, business planning and innovative research & training services.

Aware of the opportunities and risks in English wine production we bring a considered but enthusiastic approach to our work and provide a friendly, high-quality service.
